WORK EXPERIENCE

- Completed intensive 3-month MERN stack training, mastering HTML, CSS, and JavaScript for creating responsive web designs.
- Demonstrated proficiency by building diverse projects using React.js, Node, and Express.js, showcasing hands-on development skills.
- Successfully integrated APIs, employing Redux for efficient state management, enhancing user experiences in dynamic applications.
- Gained expertise in database management with PostgreSQL and utilized Sequelize ORM for streamlined data operations.
- Acquired comprehensive knowledge of full-stack development, enabling end-to-end implementation of web solutions.
- Developed a strong foundation in MERN stack technologies, ready to contribute effectively to real-world projects and teams

PROJECTS

E-commerce (Full Stack)

- Frontend using React.js
- Using fake-Store APIs
- Implemented Firebase authentication, ensuring secure user registration, login, and personalized shopping interactions.

Movies Search Portal

- A movies search portal has been developed using JavaScript,
- Offering an intuitive interface to explore and discover films.
- Users can easily search and access information about various movies, enhancing their entertainment experience.

To-do List

- Developed a to-do list project using React.js, demonstrating my expertise in front-end development
- The project manages tasks efficiently, and has an interactive user interface

CORE SKILLS

Languages: JavaScript, HTML, CSS, C++
Developer Tools: Git, VSCode, Postman, Draw.io
Frameworks & Libraries: React.js, Bootstrap
Databases: MySQL

EDUCATION

University of Education Township Lahore
BSIT, Information Technology, CGPA (3.0)   (Completion Year 2024)
